Guido Scarabottolo - Il Sole 24 Ore

"Brain and the Lexicon" Conference - September 21-22, 2015
Center for Logic, Language and Cognition - University of Turin
Palazzo del Rettorato, via Verdi 8, Turin

Mon SEPTEMBER, 21

- 09.15** Greetings: **Gianmaria AJANI** [Rector, Università di Torino]
Massimo FERRARI [Chair of the Department of Philosophy and Education, Università di Torino]
Diego MARCONI [Coordinator of the project The Role of Visual Imagery in Lexical Processing, funded by Compagnia San Paolo]
- 10.00** Opening Lecture
Gabriella VIGLIOCCO [University College London]
On the representation of abstract concepts and words
- 11.15** Coffee Break
- 11.45** **Matthew LAMBON RALPH** [University of Manchester]
The roles of anterior temporal regions in semantic cognition: Convergent clinical and neuroscience data
- 13.00** Lunch Break
- 15.00** **Friedemann PULVERMÜLLER** [Freie Universität, Berlin]
From concepts to lexical semantics – is there a benefit?
- 16.15** Coffee Break
- 16.45** **Diego MARCONI** [Università di Torino]
Work on the dual structure of lexical semantic competence

Tue SEPTEMBER, 22

- 09.30** **Guido GAINOTTI** [Università Cattolica del Sacro Cuore, Roma]
Is the abstraction capacity due to the amodal format of conceptual representations or to the power of language?
- 10.45** Coffee Break
- 11.15** Closing Lecture
David KEMMERER [Purdue University, West Lafayette]
On the need to distinguish between word meanings and nonlinguistic concepts in cognitive neuroscience
